

NEW YORK PSYCHOANALYTIC SOCIETY & INSTITUTE

A home for the mind

NYPSI, the first institute in the country, is a scholastic leader in psychoanalytic training. Combining both classical instruction with contemporary perspectives, it offers an unparalleled psychoanalytic education.

At NYPSI

Our curriculum incorporates classical papers with diverse modern psychoanalytic approaches. As a result, NYPSI prepares students to engage in excellent, independent psychodynamic and psychoanalytic work. The option of **part-time classwork** allows us to meet the evolving needs of our students. We further strive to be responsive to the social surround, with both local and international faculty, a **renowned Treatment Center**, and affiliations to public schools, hospitals, and other institutes that create intellectual reciprocity and camaraderie. Our community prizes ongoing collaboration and discussion, as highlighted by our scientific programs, study groups, and various academic programs. NYPSI provides a home for a **vibrant psychoanalytic membership** dedicated to **ongoing study of the mind, service to community, and rigorous education of our student body.**

NYPSI Training Programs

- [Adult Psychoanalytic Training Program](#)
- [Child and Adolescent Psychoanalytic Training Program](#)—classes merged with Columbia, PANY & Cincinnati psychoanalytic institutes
- [Licensure Qualifying Program in Psychoanalysis](#)
- [Preparatory Program in Psychoanalysis and Dynamic Psychotherapy](#)
- [Psychoanalytic Fellowship Program](#)
- [Psychology Programs: Internship, Externship, Postdoctoral Hours](#)
- [Scholars Program](#)—non-clinical psychoanalytic education for academics who wish to enhance their areas of expertise with psychoanalytic education

Tripartite Model of the Psychoanalytic Training Program

1. Personal training analysis
2. Weekly supervision of analytic cases
3. Didactic curriculum

NYPSI's Treatment Center

Students and candidates at NYPSI receive referrals from NYPSI's Treatment Center. NYPSI's Treatment Center provides low-fee treatment to individuals in the community who couldn't otherwise afford high quality treatment. The Treatment Center offers psychotherapy and psychoanalysis for adults, adolescents, and children. Psychological testing is also available.

Class Schedule

Classes are offered in person on Monday and Wednesday evenings from 7-8:30PM and 8:30-10PM. Candidates may choose full-time (twice-weekly) or part-time (once-weekly) schedules to accommodate their professional and family commitments.

Financial Aid

Assistance is available to candidates in Analytic Training demonstrating financial need. Fees for supervision are included in the tuition rates.

Diversity and Inclusivity

As an organization, NYPSI places a focus on diversity. This is highlighted by the establishment of the CRCD (Committee on Racial Consciousness and the Diversities). This committee has established study groups that explore race, the psychodynamics of racism, and systemic racism in our society. Additionally, several courses about racism and diversity have been added to our curriculum. We furthermore work to facilitate collaborations with diverse institutes, such as Harlem Family Institute and Montefiore. NYPSI's curriculum and scientific meetings continue to incorporate the growing psychoanalytic understanding of gender and sexuality. Specific classes on gender and pregnancy are offered, and studies of sexual development and identity are explored in development, theory and technique classes.
